Rapid Development Times

# Working with 4000 of the UK's Best Research Scientists

MRC Technology is the exclusive commercialisation catalyst for the UK Medical Research Council (MRC), working to translate cutting edge scientific discoveries into commercial products.

We bridge the gap between innovative basic science and making medicine. By providing chemical tools and antibodies with therapeutic potential, we give pharmaceutical and biotechnology companies new starting points for drug development, based on MRC advances in science.

Any income we generate goes back to MRC for further research. We commercialise our discoveries in order to benefit healthcare.

Working with MRC can be beneficial to your company - you will have access to some of the world's finest scientific minds and inventions. Indeed, our expertise is used by the world's leading pharmaceutical companies.

MRCT can work with you on a number of different levels:

IP Licensing

Partnered Research

Humanizing Antibodies

Drug Discovery Initiatives

## KEY MRC DISCOVERIES

1913 Tackling tuberculosis

1916 Rickets caused by lack of vitamin D

1933 Influenza is a virus

1953 Structure of DNA

1956 Smoking causes cancer

1973 Magnetic Resonance Imaging

1974 DNA sequencing

1975 Monoclonal antibody production

1986 **Humanized antibodies**

1991 Folic acid treatments cut spina bifida

1993 Gene for Huntington's disease

1998 Genetic blueprint of nematode worm

2003 Stems cells to treat spinal injuries
